

Annotation - IMPORTANT - regarding versions.

If the wording \*NUMBER of the contract is used - it means that it applies to all versions of the project token contracts that could be purchased through the WEB3 website and those listed in the introduction .

# WHITEPAPER AND LEGAL TERMS

CRYPTO SANTA

CRYPTO SUPER HEROES

Smart contract: 0X224EC56DA83A13A803F171E5A366F5EA4F09680B

The team has made an effort to ensure that the Token meets the legal definitions of virtual currencies, meaning that it has starting liquidity on the DEX exchange, and that its exchange rate is independent of the token's creators. When you participating in the purchase / claim of the token you confirm that you have read and accept the legal conditions, terms and conditions and exclusions available in the whitepaper, at the same time you confirm that you accept as an individual the convertibility of the token in the BSC network. However, due to different legal jurisdictions, the purchase of a token should only be made when you are sure that it is exempt from sales tax. If you are not so sure, do not buy the token. Therefore, the purchase of the token is not possible for the following countries: countries belonging to the European Union, American Samoa, Bahrain, Barbados,

Grenada, Guam, North Korea, Macau, Marshall Islands, Mongolia, Namibia, Palau, Panama, Saint Lucia, Samoa, Trinidad and Tobago, Tunisia, United Arab Emirates. When buying a token through the WEB3 website and mechanism, it is important to remember that this decision involves a significant margin for the team. The buyer must be aware that he can purchase the token at a better offer on the DEX exchange. It is worth remembering that the buyer, by purchasing through this mechanism, confirms that he is fully aware that it is also possible to purchase the token on the DEX exchange at a much better offer. However, by choosing to purchase through the WEB3 mechanism, the buyer can take advantage of the convenient and secure purchase process offered by the token's creators. The buyer of the token through WEB3 on the site supports the further development of the team, its maintenance, and contributes to the maintenance of the IT infrastructure and the ability to carry out further projects based on the WEB3 purchase. (1) Smart contract interpretation

In a simple word, "smart contract" is a contract (contract) agreement performed programmatically.

The main objective of the smart contract is to meet the needs of a number of common contracts

(such as payment agreements, mortgage agreements, confidentiality agreements, and even enforcement agreements). The smart contract minimizes the impact of accidents or the events by implementation of the agreement, removing third-party trust mechanism to minimize the cost of trust between the parties, reducing fraud losses and non-conformance with the agreement, decreasing accidents, improving the efficiency of social operation and achieving other economic goals.

(2) TOKEN BSC BEP20 0X224EC56DA83A13A803F171E5A366F5EA4F09680B \*(1) smart contract

The user chooses the relevant conditions to generate the smart contract, such as the lease time, the payment of the deposit, the rent and the deductible, etc.. When the smart contract obtains external data, detected in line with the preparatory conditions, will take the initiative to replace the enterprise and users to respond, such as automatic delivery, automatic refund, automatic payment and so on. The whole process is recorded in the blockchain, to ensure that all states of correctness, integrity and non-tampering, and to reduce the impact of accidents.

You must read the following “Legal Considerations, Risks and Disclaimer” section in full before: (i)

making use of this White Paper and any and all information available on the website(s) of

TOKEN BSC BEP20 0X224EC56DA83A13A803F171E5A366F5EA4F09680B \*(1) (the “Contract’s  
Creator of the token”) located at TOKEN BSC BEP20  
0X224EC56DA83A13A803F171E5A366F5EA4F09680B \*(1) (the “Website”);

and (ii) participating in the Contract’s Creator of the token’s token sale outlined in this White Paper  
(the „Token Sale”, „Airdrop”, „Token Presale”).This

“Legal Considerations, Risks and Disclaimer” section applies to this White Paper and any and all information available on the Website. The contents of this “Legal Considerations, Risks and Disclaimer” section outlines the terms and conditions applicable to you in connection with (i) your use of this White Paper and of any and all information available on the Website; and (ii) your participation in the Token Sale, in each case in addition to any other terms and conditions that we may publish from time to time relating to this White Paper, the Website and the Token Sale (such terms hereinafter referred to as the “Terms”). This “Legal Considerations, Risks and Disclaimer” section may be updated from time to time and will be published as part of the latest version of the White Paper which shall be available on the Website. You shall be obliged to read in full the latest available version of the White Paper available on the Website prior to participating in the Token Sale. The information set forth in this “Legal Considerations, Risks and Disclaimer” section may not be exhaustive and does not imply any elements of a contractual relationship. While we make every reasonable effort to ensure that all information: (i) in this White Paper; and (ii) available on the Website (all the information in the White Paper and all information available on the Website hereinafter referred to as the “Available Information”) is accurate and up to date, such material in no way constitutes professional advice. Individuals intending to participate in the Token Sale should seek independent professional advice prior to acting on any of the Available Information.

#### REFLINK / SHARE MECHANIC – INFORMATION AND DISCLAIMERS

By using a reflink address to purchase tokens, you acknowledge that it is aware that it is sending a portion of the funds used to purchase tokens DIRECTLY to the referrer's wallet. The creators of the contract are not acting as an intermediary in this transaction and are unable to verify or confirm any information received from the referrer. These funds do not flow through the team's portfolio in any way - nor are we able to manage or return them. You do so entirely at your own risk, knowing that in this case any claims should be directed to the referrer.

IF YOU DO NOT PERSONALLY KNOW THE REFERRER, DO NOT BUY A TOKEN THROUGH THEM.  
Blockchain provides complete anonymity and any legal claims may not be possible.

#### LEGAL CONSIDERATIONS

The Contract's Creator of the token has used reasonable endeavours to approach the Token Sale in a responsible and sensible manner. Given the legal uncertain of distributed ledger technologies, businesses and activities as well as cryptocurrencies and cryptocurrency-related businesses and activities in a number of jurisdictions, the Contract's Creator of the token has spent time and resources to consider its business approach

and where it proposes to operate now and in the future. The Contract's Creator of the token has worked with Polished Law Firm in respect of law matters. The Contract's Creator of the token has NOT taken any other legal advice

in any other jurisdiction. As such, it is possible that the Contract's Creator of the token's TOKEN BSC BEP20 0X224EC56DA83A13A803F171E5A366F5EA4F09680B \*(1) tokens

described in this White Paper and which are the subject of the Token Sale (the "Tokens") may comprise a security in your jurisdiction or the offer for sale by the Contract's Creator of the token of the Tokens in your

jurisdiction may be a regulated or prohibited activity and in either of these cases the Contract's Creator of the token may

be liable for the same. The Contract's Creator of the token accepts no responsibility or liability to you in these or any other

circumstances. You are strongly advised to take independent legal advice in respect of the legality in your jurisdiction of your participation in the Token Sale and purchase of Tokens.

The Financial Services Commission has on 12th October 2017 published a draft of the principledbased regulations which relate to the use of distributed ledger technology for storing and transmitting value belonging to others, and which regulations come into effect on 1st January 2018.

The Financial Services Commission has also announced that regulations relating to public token sales will come into effect in early 2018. The Contract's Creator of the token will use reasonable commercial endeavours to

comply with all regulations and, to the extent reasonably practicable with the regulations of such other jurisdictions that it is able to. However, due to the current uncertain state of regulation relating to distributed ledger technology and token sales across the world, the Contract's Creator of the token cannot guarantee

the legality of the Token Sale or the future other tokens to be developed as envisaged by the Available Information or the Contract's Creator of the token's ability to develop, structure and licence any future Token

functionality in every jurisdiction but the Contract's Creator of the token will use reasonable commercial endeavours to be

responsive and compliant in the face of any regulatory inquiry.

The Tokens are not securities. In the event that you purchase Tokens, your purchase cannot be refunded or exchanged. The Contract's Creator of the token does not recommend purchasing

Tokens for speculative investment purposes. Tokens do not entitle you to any equity, governance, voting or similar right or entitlement in the Contract's Creator of the token or in any of its affiliated companies. Tokens are

sold as digital products, similar to downloadable software, digital music and the like. The Contract's Creator of the token

does not recommend that you purchase Tokens unless you have prior experience with cryptographic tokens, blockchain-based software and distributed ledger technology and unless you have taken independent professional advice.

The Contract's Creator of the token may choose to make the Available Information in a number of different languages. In

the event of any conflict between the English version of the Available Information and any foreign language version, the English language version will prevail.

#### REGIONAL RESTRICTIONS

Citizens, nationals, residents (tax or otherwise) and/or green card holders of each of: (i) the United States of America; (ii) the People's Republic of China; (iii) South Korea; (iv) Vietnam; and (v) any other jurisdiction which prohibits the possession, dissemination or communication of the Available Information and/or prohibits participation in the Token Sale or the purchase of Tokens or the offer for sale of the Tokens or any similar activity or product (collectively the "Restricted Jurisdictions") or any other Restricted Persons are not permitted to participate in the Token Sale. The term "Restricted Persons" refers to any firm, Contract's Creator of the token, partnership, trust, corporation, entity, government, state or agency of a state or any other incorporated or unincorporated body or association, association or partnership (whether or not having separate legal personality) that is established and/or lawfully existing under the laws of a Restricted Jurisdiction (including in the case of United States of America, under the federal laws of the United States of America or under the laws of any of its States).

The Tokens are not intended to constitute, and shall not constitute, securities in any jurisdiction. This

White Paper does not constitute a prospectus or offer document of any sort and the Available Information is not intended to constitute an offer of securities or a solicitation for investment in securities in any jurisdiction. The Contract's Creator of the token does not provide any opinion or any advice to purchase,

sell, or otherwise transact with Tokens and the presentation, publication or communication of all or any part of the Available Information shall not form the basis of, or be relied upon in connection with, any contract or investment decision.

#### NO ADVICE

No part of the Available Information should be considered to be business, legal, financial or tax

advice regarding the Contract's Creator of the token, the Tokens, the Token Sale or any of the matters to which all or any part of the Available Information relates. You should consult your own legal, financial, tax or other professional advisor regarding the Available Information. You should be aware that you may be required to bear the financial risk of any purchase of Tokens for an indefinite period of time.

#### LIMITATION OF LIABILITY

In no event shall the Contract's Creator of the token or any current or former employees, officers, directors, partners, trustees, representative, agents, advisors, contractors, or volunteers of the Contract's Creator of the token (hereinafter the "Contract's Creator of the token Representatives") be responsible or accountable or liable in any way whatsoever to any purchaser of Tokens for any loss of profits or otherwise or for any lost savings or for any incidental direct indirect special or consequential damages in each case arising out of or from or in connection with:

- any failure by the Contract's Creator of the token or any of its affiliated companies to deliver or realise all or any part of the project or the strategy or the membership network or the Token features described in or envisaged by the Available Information;
- your use or inability to use at any time the services or the products or the strategy or the membership network or Tokens offered by the Contract's Creator of the token;
- the breach of any of these Terms by the Contract's Creator of the token or by the Contract's Creator of the token Representatives or by you or by any third party;
- any security risk or security breach or security threat or security attack or any theft or loss of data including but not to hacker attacks, losses of password, losses of private keys, or anything similar;
- mistakes or errors in code, text, or images involved in the Token Sale or in any of the Available Information; or
- any information contained in or omitted from the Available Information;
- any expectation promise representation or warranty arising (or purportedly arising) from the Available Information;
- the volatility in pricing of Tokens in any countries and/or on any exchange or market (regulated,

pursuit of such claim by you.

If any provision or part-provision of this “Legal Considerations, Risks and Disclaimer” section is or becomes invalid, illegal or unenforceable, it shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision or part-provision shall be deemed deleted. Any modification to or deletion of a provision or part-provision under this “Legal Considerations, Risks and Disclaimer” section shall not affect the validity and enforceability of the rest of this “Legal Considerations, Risks and Disclaimer” section.

#### NO REPRESENTATION & WARRANTIES

Notwithstanding any other provision of these Terms or any statement made expressly or impliedly in the Available Information, the Contract’s Creator of the token does not make or purport to make, and hereby disclaims,

any representation warranty undertaking or covenant in any form whatsoever to any entity or person, including any representation warranty undertaking or covenant in relation to the truth, accuracy and completeness of any of the information set out in the Available Information.

#### REPRESENTATION & WARRANTIES BY YOU

By howsoever accessing and/or accepting possession or communication of all or any part of the Available Information, you represent and warrant (and shall be deemed to represent and warrant) to the Contract’s Creator of the token on the date of such access or on the latest date on which you retain possession of all or

any part of the Available Information as follows:

you are over 18 (eighteen) years of age;

you agree and acknowledge that the Tokens do not constitute shares or equities or securities or financial instruments or investments in any form in any jurisdiction;

you agree and acknowledge that the Available Information (including the White Paper and the Website) does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities in any jurisdiction or a solicitation for investment in securities and you are not bound to enter into any contract or binding legal commitment and no cryptocurrency or other form of payment is to be accepted on the basis of the Available Information;

you agree and acknowledge that no regulatory authority has examined or approved of the Available Information, no action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction and the publication, distribution or dissemination of all or any part of the Available Information to you does not imply that the applicable laws, regulatory requirements or rules have

software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain technology and smart contract technology;

you are fully aware and understand that in the case where you wish to purchase any Tokens, there are risks associated with: (A) the Contract's Creator of the token and its business and operations; (B) the Tokens; (C) the

Token Sale; and (D) relying or acting on all or any part of the Available Information;

you agree and acknowledge that the Contract's Creator of the token is not liable for any direct indirect special incidental

consequential or other losses of any kind in tort contract or otherwise (including but not to loss of revenue income or profits or loss of use or data or loss of reputation or loss of any economic or other opportunity of whatsoever nature or howsoever arising) arising out of or in connection with

any acceptance of or reliance on the Available Information or any part thereof by you; and all of the above representations and warranties are true, complete, accurate and not misleading

from the time of your last access to and/or possession of (as the case may be) the Available Information.

#### CAUTIONARY NOTE ON FORWARD-LOOKING STATEMENTS

All statements contained in the Available Information, statements made in any press releases or in any place accessible by the public and oral statements that may be made by the Contract's Creator of the token or the

Contract's Creator of the token Representatives (as the case may be), that are not statements of historical fact, constitute

"forward looking statements". Some of these statements can be identified by forward-looking terms

such as "aim", "target", "anticipate", "believe", "could", "estimate", "expect", "if", "intend", "may", "plan", "possible", "probable", "project", "should", "would", "will" or other similar terms. However,

these terms are not the exclusive means of identifying forward-looking statements. All statements

regarding the Contract's Creator of the token's financial position, business strategies, plans and prospects and the future

prospects of the industry which the Contract's Creator of the token is in are forward-looking statements. These forwardlooking statements, including but not to statements as to the Contract's Creator of the token's revenue profitability

and growth, expected revenue profitability and growth, prospects, future plans, other expected industry trends and other matters discussed in the Available Information regarding the Contract's Creator of the token are

matters that are not historic facts, but only estimations and predictions. The Contract's Creator of the token makes no representation or warranty on having made any predictions or estimates or expectations on the basis of any formula, any mathematical or scientific modelling or forecast, or having made any due and proper enquiries or having undertaken any independent research or studies or otherwise. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual future results, performance or achievements of the Contract's Creator of the token to be materially different from any future results, performance or achievements expected, expressed or implied by such forward-looking statements. These factors include, amongst others:

- changes in legal political social economic and stock or cryptocurrency market conditions and the regulatory environment in the countries in which the Contract's Creator of the token conducts its Token Sale its business and/or its operations;
- the risk that the Contract's Creator of the token may be unable or execute or implement its business strategies and future plans;
- changes in interest rates and exchange rates of fiat currencies and cryptocurrencies;
- changes in the anticipated growth strategies and expected internal growth of the Contract's Creator of the token;
- changes in the availability and fees payable to the Contract's Creator of the token in connection with its business and operations;
- changes in the availability and salaries of employees who are required by the Contract's Creator of the token to operate its business and operations;
- changes in preferences of customers of the Contract's Creator of the token;
- changes in competitive conditions under which the Contract's Creator of the token operates, and the ability of the Contract's Creator of the token to compete under such conditions;
- changes in the future capital needs of the Contract's Creator of the token and the availability of financing and capital to fund such needs;
- war or acts of international or domestic terrorism;

occurrences of catastrophic events, natural disasters and acts of God that affect the businesses and/or operations of the Contract's Creator of the token;  
other factors beyond the control of the Contract's Creator of the token; and  
any risk and uncertainties associated with the Contract's Creator of the token and its business and operations, the Tokens,  
the Token Sale and reliance on all or any part of the Available Information.

All forward-looking statements made by or attributable to the Contract's Creator of the token or Contract's Creator of the token Representatives  
are expressly qualified in their entirety by such factors. Given that risks and uncertainties that may cause the actual future results, performance or achievements of the Contract's Creator of the token to be materially  
different from that expected, expressed or implied by the forward-looking statements in the Available Information, undue reliance must not be placed on these statements.

These forward-looking statements are applicable only as of the later of the date of publication of the White Paper and the latest date that the Website has been updated. Neither the Contract's Creator of the token nor the

Contract's Creator of the token Representatives nor any other person represents, warrants and/or undertakes that the

actual future results, performance or achievements of the Contract's Creator of the token will be as discussed in those

forward-looking statements. The actual results, performance or achievements of the Contract's Creator of the token may

differ materially from those anticipated in these forward-looking statements.

Nothing contained in the Available Information is or may be relied upon as a promise, representation or undertaking as to the future performance or policies of the Contract's Creator of the token.

Further, the Contract's Creator of the token  
disclaims any responsibility to update any of those forward-looking statements or publicly announce any revisions to those forward-looking statements to reflect future developments, events or circumstances, even if new information becomes available or other events occur in the future.

#### RISK FACTORS

You should carefully consider and evaluate each of the following risk factors and all other information contained in these Terms before deciding to participate in the Token Sale. To the best of the Contract's Creator of the token's knowledge and belief, all risk factors which are material to you in making an informed

of Tokens after they have been made available for trading on any cryptocurrency exchange or market.

Future sales or issuance of the Tokens could materially and adversely affect the market price of Tokens.

Any future sale or issuance of the Tokens would increase the supply of Tokens in the market and this may result in a downward price pressure on the Token. The sale or distribution of a significant number of Tokens outside of the Token Sale (including but not to the sales of Tokens undertaken after the completion of the initial crowdsale, issuance of Tokens to persons other than purchasers for purposes of community initiatives, business development, academic research, education and market expansion and issuance of Tokens as a reward to users of the Contract's Creator of the token's or otherwise), or the perception that such further sales or issuance may occur, could adversely affect the trading price of the Tokens.

Negative publicity may materially and adversely affect the price of the Tokens.

Negative publicity involving the Contract's Creator of the token, the Contract's Creator of the token's that is yet to be developed, the Tokens or any of the key personnel of the Contract's Creator of the token and/or regulation of distributed ledger technologies, cryptocurrencies and/or crowdsales of tokens in any jurisdiction, may materially and adversely affect the market perception or market price of the Tokens, whether or not it is justified.

The Contract's Creator of the token may not be able to pay any anticipated rewards in the future.

There is no assurance that there will be sufficient engagement in the Contract's Creator of the token's other tokens

that is yet to be developed such that you will receive any rewards anticipated to be distributed to active users of the Contract's Creator of the token's other tokens. Further, even in the event there is substantial

engagement and interactions among the users of the Contract's Creator of yet to be developed, there is no assurance you personally will receive any part of the rewards. This is because the ability of the Contract's Creator of the token to pay any reward to you will depend on the future results of operations

and the future business and financial condition of the Contract's Creator of the token, and there is no assurance of the

future results of operations and the future business and financial condition of the Contract's Creator of the token.

There is no assurance of any success of the Contract's Creator of the token's Token Sale or other tokens that is yet to

be developed as envisaged by the Available Information.

The value of, and demand for, the Tokens hinges heavily on the performance of the Contract's Creator of the token's

Token Sale and the continuous active engagement

of its users and success of its contemplated business lines. There is no assurance that the Contract's Creator of the token's

Token Sale will be successful or that its will gain or

continue to gain traction. While the Contract's Creator of the token has made every effort to provide a realistic estimate,

there is also no assurance that the cryptocurrencies raised in the Token Sale will be sufficient for the development of the Contract's Creator of the token's other tokens. For the foregoing or any other reason, the

development of the Contract's Creator of the token's other tokens and launch of the anticipated Token functionality

may not be completed and there is no assurance that it will be launched at all. As such, distributed Tokens may hold little or no worth or value and this would impact any trading price and/or use of the Tokens.

The trading price of the Tokens may fluctuate following the Token Sale.

The prices of cryptographic tokens in general tend to be relatively volatile, and can fluctuate significantly over short periods of time. The demand for, and the corresponding market price of, the Tokens may fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond the control of the Contract's Creator of the token:

new technical innovations;

analysts' speculations, recommendations, perceptions or estimates of the Token's market price or the Contract's Creator of the token's financial and business performance;

changes in market valuations and token prices of entities with businesses similar to that of the Contract's Creator of the token that may be listed on the same cryptocurrency exchanges or markets as the Tokens;

announcements by the Contract's Creator of the token of significant events, for example partnerships, sponsorships or

new product developments;

fluctuations in market prices and trading volume of cryptocurrencies on cryptocurrency exchanges or

markets;  
additions or departures of key personnel of the Contract's Creator of the token;  
success or failure of the Contract's Creator of the token's management in implementing business and growth strategies;  
and/or  
changes in conditions affecting the blockchain or financial technology industry, the general economic conditions or market sentiments, or other events or factors.

The funds raised in the Token Sale are exposed to risks of theft.

The Contract's Creator of the token will make every effort to ensure that the funds received from the Token Sale will be

securely held in an escrow wallet, which is a multi-signature address with access thereto by private keys held by reputable and trusted parties. Further, the Contract's Creator of the token may make every effort to ensure

that the funds received by it from Token Sale will be securely held through the implementation of security measures. Notwithstanding such security measures, there is no assurance that there will be no theft of the cryptocurrencies as a result of hacks, sophisticated cyber-attacks, distributed denials of service or errors, vulnerabilities or defects on the Token Sale website, in the smart contract(s) on

which the escrow wallet and the Token Sale relies, on the Ethereum blockchain or any other blockchain, or otherwise. Such events may include, for example, flaws in programming or source code leading to exploitation or abuse thereof. In such event, even if the Token Sale is completed, the

Contract's Creator of the token may not be able to receive the cryptocurrencies raised and the Contract's Creator of the token may not be able

to use such funds for the development of the Contract's Creator of the token's other tokens. In such case, the launch

of the Contract's Creator of the token's other tokens might be temporarily or permanently curtailed. As such,

distributed Tokens may hold little worth or value and this would impact their trading price.

#### RISKS RELATING TO THE ESCROW WALLET

The private keys to the escrow wallet may be compromised and the cryptocurrencies may not be able to be disbursed. The escrow wallet is designed to be secure. Each of the holders of the three (3) private keys to the escrow wallet will use all reasonable efforts to safeguard their respective keys,

but in the unlikely event that any two (2) of the three (3) keys to the escrow wallet are, for any reason whatsoever, lost, destroyed or otherwise compromised, the funds held by the escrow wallet

may not be able to be retrieved and disbursed, and may be permanently unrecoverable. In such event, even if the Token Sale is successful, the Contract's Creator of the token will not be able to receive the funds raised

and the Contract's Creator of the token will not be able to use such funds for the development of the Contract's Creator of the token's business

strategy. As such, distributed Tokens may hold little worth or value and this would impact their trading price.

#### RISKS RELATING TO THE CONTRACT'S CREATOR OF THE TOKEN

The Contract's Creator of the token may be materially and adversely affected if it fails to effectively manage its operations

as its business develops and evolves, which would have a direct impact on its ability to develop, maintain or operate the Contract's Creator of the token's other tokens and/or develop, structure and/or licence any

Token functionality.

The financial technology and cryptocurrency industries in which the Contract's Creator of the token competes have grown

rapidly over the past few years and continue to evolve in response to new technological advances, changing business models, shifting regulations and other factors. As a result of this constantly changing environment, the Contract's Creator of the token may face operational difficulties in adjusting to the changes,

and the sustainability of the Token will depend on its ability to manage its operations, ensure that it hires qualified and competent employees, and provides proper training for its personnel. As its business evolves, the Contract's Creator of the token must also expand and adapt its operational infrastructure. The

Contract's Creator of the token's business will in part rely on its blockchain-based software systems, cryptocurrency

wallets or other related token storage mechanisms, blockchain technology and smart contract technology. All of these systems, tools, and skillsets represent complex, costly, and rapidly changing technical infrastructure. In order to demonstrate continued ability to effectively manage technical support infrastructure for the Contract's Creator of the token's and the

future functionality of the Tokens, the Contract's Creator of the token will need to continue to upgrade and improve its

data systems and other operational systems, procedures, and controls. These upgrades and improvements will require a dedication of resources and are likely to be complex and increasingly

rely on hosted computer services from third parties that the Contract's Creator of the token does not or will not control. If

the Contract's Creator of the token is unable to adapt its systems and organisation in a timely, efficient, and cost-effective

manner to accommodate changing circumstances, its business, financial condition and/or results of operations may be adversely affected. If the third parties whom the Contract's Creator of the token relies on are subject to

a security breach or otherwise suffer disruptions that impact the services the Contract's Creator of the token uses, the

integrity and availability of its internal information could be compromised, which may consequently cause the loss of confidential or proprietary information and/or economic loss. The loss of financial,

labour or other resources, and any other adverse effect on the Contract's Creator of the token's business, financial

condition and/or operations, would have a direct adverse effect on the Contract's Creator of the token's ability to develop

maintain or operate, structure and/or license

the anticipated Token functionality. Any adverse effects affecting the Contract's Creator of the token business or

technology are likely to also adversely impact the , liquidity, and trading price of the Tokens.

The Contract's Creator of the token may experience system failures, unplanned interruptions in its network or services,

hardware or software defects, security breaches or other causes that could adversely affect the Contract's Creator of the token's infrastructure network, and/or the Contract's Creator of the token's .

The Contract's Creator of the token is not able to anticipate when there would be occurrences of hacks, cyber-attacks,

distributed denials of service or errors, vulnerabilities or defects in:

in the smart contracts on which the Contract's Creator of the token or the Contract's Creator of the token's business

strategy relies, or on the Ethereum or any other blockchain. Such events may include, for example, flaws in programming or source code leading to exploitation or abuse thereof. The Contract's Creator of the token may not

be able to detect such hacks, cyber-attacks, distributed denials of service errors vulnerabilities or defects in a timely manner, and may not have sufficient resources to efficiently cope with multiple service incidents happening simultaneously or in rapid succession.

The Contract's Creator of the token's network or services, which would Token value

yet to be developed and, if successfully structured, developed, licensed and launched, the Token functionality, could be disrupted by numerous events, including natural disasters, equipment breakdown, network connectivity downtime, power losses, or even intentional disruptions of its services, such as disruptions caused by software viruses or attacks by unauthorized users, some of which are beyond the Contract's Creator of the token's control. There can be no assurance that cyber-attacks, such as

distributed denials of service, will not be attempted in the future or that the Contract's Creator of the token's security

measures will be effective. The Contract's Creator of the token may be prone to attacks on its infrastructure intended to

steal information about its technology, financial data or user information or take other actions that would be damaging to the Contract's Creator of the token and/or holders of the Tokens. Any significant breach of the

Contract's Creator of the token's security measures or other disruptions resulting in a compromise of the usability,

stability, and security of the Contract's Creator of the token's may adversely

affect the , liquidity and/or trading price of the Tokens.

The Contract's Creator of the token may in the future be dependent in part on the location and data centre facilities of

third parties.

The Contract's Creator of the token's future infrastructure network may be established in whole or in part through servers

which it owns and/or houses at the location facilities of third parties, and/or servers that it rents at data centre facilities of third parties. If the Contract's Creator of the token is unable to renew its data facility leases on

commercially reasonable terms or at all, the Contract's Creator of the token may be required to transfer its servers to a

new data centre facility, and may incur significant costs and possible service interruption in connection with the relocation. These facilities are also vulnerable to damage or interruption from, among others, natural disasters, arson, terrorist attacks, power losses, and telecommunication failures.

Additionally, the third-party providers of such facilities may suffer a breach of security as a result of third-party action, employee error, malfeasance or otherwise, and a third party may obtain unauthorised access to the data in such servers. The Contract's Creator of the token and the providers of such facilities

Contract's Creator of the token or the Tokens may be affected by newly implemented regulations relating to distributed

ledger technologies, businesses and activities as well as cryptocurrencies and cryptocurrency-related businesses and activities, including having to take measures to comply with such regulations, or having to deal with queries, notices, requests or enforcement actions by regulatory authorities, which may come at a substantial cost and may also require substantial modifications to the Contract's Creator of the token's and/or the anticipated Token functionality.

This may impact the appeal or practicality or functionality of the Contract's Creator of yet to be developed and/or the anticipated Token functionality for users and result in decreased usage of and demand for the Contract's Creator of the token's other tokens and the Tokens. Further, should the costs

(financial or otherwise) of complying with such newly implemented regulations exceed a certain threshold, maintaining the Contract's Creator of the token's and/or

developing, structuring, licensing and/or launching the Token functionality may no longer be commercially viable, and the Contract's Creator of the token may opt to discontinue the Contract's Creator of the token's other tokens that

is yet to be developed and/or the anticipated Token functionality, and/or the Tokens. Further, it is difficult to predict how or whether governments or regulatory authorities may implement any changes to laws and regulations affecting distributed ledger technology and its applications, including the Contract's Creator of the token's and/or the anticipated Token functionality, and/or the Tokens.

The Contract's Creator of the token may also have to cease operations in a jurisdiction that makes it illegal to operate in

such jurisdiction, or make it commercially unviable or undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction. In scenarios such as the foregoing, the , liquidity, and/or trading price of Tokens will be adversely affected and/or Tokens may cease to be traded.

There may be unanticipated risks arising from the Tokens.

Cryptographic tokens such as the Tokens are a relatively new and dynamic technology. In addition to the risks included in the above discussion of risk factors, there are other risks associated with your purchase, holding, and use of the Tokens, including those that the Contract's Creator of the token cannot anticipate. Such

risks may further appear as unanticipated variations or combinations of the risks discussed above.
